

L298N Dual H-Bridge Motor Driver Module

This expansion board with L298N chipset can be quickly and easily connected to single-board computers. It enables the control and power supply of two DC motors without the need for additional power supplies

Product number MOD-L298N

Weight 0.004kg

Product description

This expansion board with L298N chipset can be quickly and easily connected to single-board computers. It enables the control and power supply of two DC motors without the need for additional power supplies or large quantities of cables. The expansion board allows control at a constant voltage between 5V and 35V. This makes the MotoDriver2 a practical solution for motor control requirements.

Technical features:

- Function: Expansion board for controlling and supplying power to up to two DC motors
- Driver: L298N
- Logic voltage: 5V
- Drive voltage: 5V - 35V
- Drive current: 2A
- Power: Max. 25W
- Dimensions: 43 x 43 x 27 mm
- Weight: 24 g

Product properties

Gross Weight (kg) 0.004

Zolltarifnummer 85423919

Country of Origin China

Brand BerryBase

Product ID MOD-L298N

EAN 4251266707417

Manufacturer ID MOD-L298N
